MEMORANDUM FOR THE RECORD

SUBJECT: Conversation with Richard Moose, Senate Foreign Relations Committee Staff, Re briefing on "Verification"

1. This afternoon I met with Mr. Moose in connection with his earlier request for a briefing of the Gore Subcommittee on community verification capabilities. I explained that the Director rather than Mr. Duckett would provide the briefing but that the Director would not be available on Monday, 13 April, or Tuesday, 14 April. Mr. Moose suggested we tentatively plan for the briefing sometime on Wednesday, 15 April and he said he would call to confirm a time and date after talking to Chairman Gore.

2. Mr. Moose said he would hope the briefing would cover both present and anticipated future capabilities of the community for verification regarding the following Soviet weapons systems:

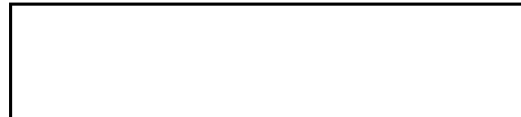

- a. ICBM (including single warheads, MRV and MIRV)
- b. Missile launching submarines
- c. Long range air force
- d. Air defense
- e. Space systems with military application
- f. Satellite reconnaissance.

3. Mr. Moose proposed that future verification capabilities be projected to correspond to the same time frame as that visualized in the SALT talks.

4. Mr. Moose confirmed that the briefing would be in executive session and that the Agency would retain custody of the transcript.
